

Fall Brings Change

For the month of October, the children in TB3 will be exploring many new and exciting ideas that revolve around the theme of Fall. They will recognize that changes are happening all around them, and we are excited to be experiencing changes in our classroom itself!

Along with discovering changes in weather and in the environment outside, TB3 is also experiencing some changes. We are happy to announce that some additions have been added to TB3 including a new student! TB3 welcomes Arvin from E1!

We are also happy to announce that new children in TB3 will have the opportunity to

express themselves in new ways. Different from other classrooms at BTN, children in TB3 can benefit from a computer in the learning environment. Each child will be given the choice to explore computer programs individually for up to twenty minutes a day. Programs include typing, drawing, and watching educational videos.

Along with the classroom computer, a name chart has been created to help new children recognize their name and match it to a personal picture of themselves. This will build the children's self identity of themselves as well as help build the foundation to learn letter-sound matches, and reading skills.

The children have

recognized the month of October and are already talking about Halloween. In order to fuel the children's interest in a positive direction, we will be having special dress up days every Monday until the big event! Reminder letters will be sent home regarding the date and theme. Tuesday, October 11, 2011 will be "My Favorite Color Day" since there is no school on Monday, October 10, 2011.

Dress for cooler weather and update your child's bin when needed.
